

0	Grades	Class	Class Description
Mon		Pre-K Program	Each day your child will participate in multiple stations of active and creative self-guided activities, as well as speciality group sessions based on weekly themes led by our teachers. These activities include dance, music, art, science experiments, sports, games, hand-on construction, and imaginative play
Mon	K-1	Drawing & Painting	Our visual arts programs aim to provide structured projects that allow for individual exploration and creativity. In this class, students will develop painting and drawing techniques, while having plenty of opportunity to explore different media and subject matter in order to discover their own interest and style.
Mon	K-1	Intro to Theater	Providing the basic structures of theater, this course walks students through the fundamentals of creating and acting out original performance art. By fostering creative thinking and promoting collaboration, the class will help students discover their confidence and develop their social skills.
Mon	2-3	Coding	This class provides powerful learning tools for budding programmers. Students learn critical concepts by creating animations and computer games with interacting characters. They will apply problem solving skills to debug programs, make customizations, and bring their imaginations to life!
Mon	2-5	Dance: Hip Hop	A lively romp through contemporary popular urban dance styles, accompanied by age-appropriate classic and current hip-hop tunes. Students will learn several different styles of dance and be able to develop their own unique voice/style. The class will culminate in a showcase at the end of the semester.
Mon	4-5	Soccer	Our athletics program focuses on the fundamentals of sport - especially the mental, physical and social aspects - to encourage enjoyment, teamwork, and self-confidence. Each session includes team-building and warmups, soccer skills and drills, scrimmages and tournaments, and guided reflection on individual goals and sportsmanship.
Tue		Pre-K Program	Each day your child will participate in multiple stations of active and creative self-guided activities, as well as speciality group sessions based on weekly themes led by our teachers. These activities include dance, music, art, science experiments, sports, games, hand-on construction, and imaginative play
Tue	K-1	Ches	From complete beginners to advancing tournament players our goal is that all students can experience both the joy & significant social/educational benefits of learning and playing chess. Our Team will prepare for Local, City, State & National Competitions. Instruction by Impact Coaching Network.

Tue	K-1	Sports & Games	Our athletics program focuses on the fundamentals of sport - especially the mental, physical and social aspects - to encourage enjoyment, teamwork, and self-confidence. This class offers an introduction to multiple individual and team sports and games. Each session includes team-building and warmups, skills and drills, scrimmages and tournaments, and guided reflection on individual goals and sportsmanship.
Tue	2-3	Mixed Media Art	Our visual arts programs aim to provide structured projects that allow for individual exploration and creativity. In this class, students will develop art and design techniques and create work that incorporates two or more mediums of art.
Tue	2-5	Chess	From complete beginners to advancing tournament players our goal is that all students can experience both the joy & significant social/educational benefits of learning and playing chess. Our Team will prepare for Local, City, State & National Competitions. Instruction by Impact Coaching Network.
Tue	4-5	Improv Theater	Led by a professional theater artist, this high-energy improvisation workshop invites children to express themselves while working together. They will build skills in active listening, character acting, and collaborative storytelling, all while moving their bodies and spending time with friends. This workshop is for anyone who wants to develop these skills, regardless of experience with improv, and is an exciting, supportive way to try something new.
Wed		Pre-K Program	Each day your child will participate in multiple stations of active and creative self-guided activities, as well as speciality group sessions based on weekly themes led by our teachers. These activities include dance, music, art, science experiments, sports, games, hand-on construction, and imaginative play
Wed	K-1	Cooking	In this hands-on cooking class, students will learn about nutrition, ingredients, and the science behind cooking, while making delicious food and having fun.
Wed	K-1	Soccer	Our athletics program focuses on the fundamentals of sport - especially the mental, physical and social aspects - to encourage enjoyment, teamwork, and self-confidence. Each session includes team-building and warmups, soccer skills and drills, scrimmages and tournaments, and guided reflection on individual goals and sportsmanship.
Wed	2-3	Lego Robotics	Teams of students engage in problem-solving, coding, and engineering – and will ultimately build and program a LEGO robot to navigate the missions of a robot obstacle course. Teams also participate in a research project to identify and solve a relevant real-world problem.

Wed	2-5	Musical Theater	Taking concepts from Intro to Theater, students' theatrical abilities are enhanced in this course through the addition of music. Students will learn vocal and emotive techniques, as well as basic music theory and story arcs. Members of the class will also create original performance art that they will perform at the end of the semester.
Wed	4-5	Photography	This class educates students on the process of capturing the world around them. Students will learn photography principles such as framing, composition, and lighting, while exploring their neighborhood through their pictures. Cameras will be provided.
Thu		Pre-K Program	Each day your child will participate in multiple stations of active and creative self-guided activities, as well as speciality group sessions based on weekly themes led by our teachers. These activities include dance, music, art, science experiments, sports, games, hand-on construction, and imaginative play
Thu	K-1	Science Experiments	Solve the Unsolvable! Participants are invited to figure out a solution to scientific mysteries, historical enigmas, and puzzle games. Working hands-on with potato batteries, conductive slime and clay, DIY switches, chemical materials and more, we'll make things light up, pop open, bubble, sizzle, inflate and along the way learn so much about the wonders of science!
Thu	K-1	Dance: Creative Movement	A combination of fitness instruction and independent exploration, these sessions will use improvisation and basic dance routines to tap into each child's innate rhythm and joy of movement. The class will culminate in a showcase at the end of the semester.
Thu	2-3	Soccer	Our athletics program focuses on the fundamentals of sport - especially the mental, physical and social aspects - to encourage enjoyment, teamwork, and self-confidence. Each session includes team-building and warmups, soccer skills and drills, scrimmages and tournaments, and guided reflection on individual goals and sportsmanship.
Thu	2-5	Filmmaking	Students will creatively and socially collaborate in this enriching afterschool program. In addition to educating students on the process of filmmaking, this class teaches children how to emotionally express themselves, through film and otherwise. This program also elicits strong friendships between it's group members and encourages students to carry these lessons of collaboration outside of the course into other aspects of their life.
Thu	4-5	Coding	This class provides powerful learning tools for budding programmers. Students learn critical concepts by creating animations and computer games with interacting characters. They will apply problem solving skills to debug programs, make customizations, and bring their imaginations to life!

Fri		Pre-K Program	Each day your child will participate in multiple stations of active and creative self-guided activities, as well as speciality group sessions based on weekly themes led by our teachers. These activities include dance, music, art, science experiments, sports, games, hand-on construction, and imaginative play
Fri	K-1	Dance: Hip Hop	A lively romp through contemporary popular urban dance styles, accompanied by age-appropriate classic and current hip-hop tunes. Students will learn several different styles of dance and be able to develop their own unique voice/style. The class will culminate in a showcase at the end of the semester.
Fri	K-1	Makers Club	Students will use a combination of DIY projects and educational kits to interact with the basics of engineering principles. This class introduces younger students to hands-on, building projects with a fun-first approach to social and STEM skill development, all through encouraging creativity and critical thinking.
Fri	2-5	Basketball	Our athletics program focuses on the fundamentals of sport - especially the mental, physical and social aspects - to encourage enjoyment, teamwork, and self-confidence. Each session includes team-building and warmups, basketball skills and drills, scrimmages and tourneys, and guided reflection on individual goals and sportsmanship.
Fri	2-5	Cooking	In this hands-on cooking class, students will learn about nutrition, ingredients, and the science behind cooking, while making delicious food and having fun.
